| Course code | : | CSE209 | Course name | : | Programming in Python |

Practical - 6

Aim: Modules and Packages:

1. Explain the difference between a Python module and a package. Provide an example of each and describe how they are used in a Python program.

2. Describe the steps to create a custom Python package with multiple submodules. Include the purpose of the `__init__.py` file and demonstrate how to import and use functions from the submodules in a main script.
